AGRICULTURAL MARKETING SERVICE,
UNITED STATES DEPARTMENT OF AGRICULTURE,
H. C. R. Stewart,
SENIOR AGRICULTURAL STATISTICIAN IN CHARGE,
SEATTLE, WASHINGTON;
ACTING UNDER STATE LAWS IN COOPERATION WITH
THE DIVISION OF GRAINS AND RAV,
WASHINGTON STATE DEPARTMENT OF AGRICULTURE,
Walter J. Robinson, Director,
OLYMPIA, WASHINGTON.

Release:
July 30, 1940,
A.M. & P.M.

THE PACIFIC NORTHWEST

WHEAT SITUATION 404136

(July 1, 1940 Stocks Report)

Old wheat stocks on July 1, 1940 in interior mills, elevators, and warehouses of Washington were 6,811,000 bushels compared with 5,700,000 the same date last year, and 8,700,000 bushels two years ago, states H. C. R. Stewart, Senior Agricultural Statistician, U. S. Agricultural Marketing Service, Seattle, Washington. The Pacific Northwest States (Washington, Oregon, and Idaho) had 10,986,000 bushels of wheat on July 1, 1940 compared with 10,460,000 a year ago and 13,300,000 bushels in July 1938. While the nation's combined farm and interior wheat stocks on July 1 were 26,000,000 bushels above the 10-year average for that date, the U. S. carryover this year in these positions is (roughly) 8,000,000 bushels less than was recorded a year ago. The situation in the three Pacific Northwest States is somewhat different, with the combined farm and interior stocks at 14,965,000 bushels on July 1, 1940, or 1,800,000 less than a year ago.

Combined farm and interior July wheat stocks in Montana, however, jumped from 2,835,000 bushels in 1938 to 14,919,000 in 1939 and 18,178,000 bushels on July 1, 1940--keeping pace with the exceptionally favorable wheat production for the 1938 and 1939 seasons. In the terminal and census positions, the State-licensed houses in the State of Washington reported 1,283,350 bushels on July 1, 1940, which is (roughly) 150,000 bushels less than a year ago. In the table below, which shows Washington and Oregon wheat stocks by classes, the most significant change in the varietal positions are that soft white, club, and western white wheat stocks on July 1, 1940 totaled 4,030,153 bushels compared with only 2,560,000 bushels the same date a year ago. July 1 holdings of hard white wheat, however, were 414,000 bushels less than a year ago.

WHEAT STOCKS - 3 POSITIONS

In comparing the visible supply of old wheat on hand as of July 1, 1940, it is apparent that there has been very little change in the picture since the same date a year ago. A reduction of 1 percent between the two periods for the combined farm, interior, and terminal wheat stocks is not significant. In the Pacific Northwest, the reduction is more apparent, with the wheat stocks in the first three positions totaling 16,858,000 bushels on July 1, 1940--or 18 percent less than the holdings of 20,534,000 bushels a year ago.

U.S. STOCKS OF OLD WHEAT IN INTERIOR MILLS, ELEVATORS, AND WAREHOUSES, JULY 1, 1940

Stocks of old wheat in interior mills, elevators, and warehouses on July 1, 1940, are estimated by the Crop Reporting Board at 33,730,000 bushels. This compares with 36,631,000 bushels in these positions a year earlier and the 10-year (1929-38) average stocks of 38,092,000 bushels. July 1 stocks of old wheat were well above last year in the Southern Plains area and in the Pacific Northwest but these larger stocks were more than offset by the smaller stocks in the important spring wheat area. Some new wheat was on hand on July 1 in interior mills, elevators and warehouses but the quantity of such wheat was much smaller than on July 1 last year due to the later harvest this year. Stocks of new wheat (1940 crop) are not included in the totals shown in this report.

Combining stocks of old wheat in interior mills, elevators, and warehouses with old wheat held on farms July 1, 1940 gives a total of 119,251,000 bushels compared with 127,003,000 bushels on that date last year and the 10-year average of 93,257,000 bushels. July 1 stocks in these positions, by classes, are shown in the following table:

Sr. Agricultural Statistician, in Charge

Note: The Washington State Department of Agriculture, Walter J. Robinson, Director, cooperated in the preparation of this report, to eliminate duplication of effort in the collection and dissemination of Washington State grain stocks information.

GRAIN REPORT

(As of July 1940)

This report was prepared and released by the Washington State Department of Agriculture, Olympia, Washington, Walter J. Robinson, Director, cooperating with the U. S. Agricultural Marketing Service, Seattle, Washington, H. C. R. Stewart, Senior Agricultural Statistician, in Charge.

Data are based on information supplied by warehousemen operating public grain warehouses in the State of Washington. The coverage is a complete enumeration--with 592 interior mills, elevators, and warehouses reporting, as well as 11 licensed terminal warehouses and 18 census mills, attached elevators, or other classifications. The report, however, does not include small independent houses which handle only the grain produced by the owner. The holdings of these small houses are included in the quarterly farm stocks figures of the U.S. Department of Agriculture.
